

# Proposed Course of Study for Conservation Biology Graduate Certificate

University of Missouri - Columbia Graduate School

Instructions: This form should be completed by the student at the time he/she begins a graduate certificate program. The chair of the certificate committee maintains the original copy on a file. A graduate student must have a GPA of 3.0 on all course work that applies to a graduate certificate. An area of study for the certificate program consists of 15 hours of graduate credit at the 7000 and 8000 level. Courses must be chosen from a list of core courses approved by the graduate certificate program. Research classes 8090, 9090, and 8050 are not applicable to a certificate program, nor are courses number 1000 - 4999.

Total Credits \_\_\_\_\_

## Potential internship for graduate certificate:

*Organization, location, dates*

---

I understand that the approval of the course of study is conditional, and is based on the assumption that I will complete my degree within the time frame outlined by departmental requirements or within 5 years of passing my comprehensive examination. In addition, I understand that no course or internship included on this form should be older than 8 years at the time the completed course of study is approved.
